## EXECUTIVE SUMMARY

Species and land conservation requires the ability to assess natural areas. The Floristic Quality Assessment Index (FQAI) is a tool that uses plants to make standardized comparisons among open land areas, to set conservation priorities, to monitor project areas, and to restore habitats. The basic component of the FQAI is the assignment of a coefficient of conservatism (C-value) to individual plant species. For a given geography, C-values reflect the plant's tolerance to natural and/or human disturbance and its affinity to a specific, unimpaired habitat.

The *Coefficient of Conservatism Rankings for the Flora of Montana: Part I* report detailed the process, methodology, and results used by the Montana Natural Heritage Program (MTNHP) in 2004-2005 and 2015 to assign C-values to 1,412 plant taxa. The *Coefficient of Conservatism Rankings for the Flora of Montana: Part II* report detailed the process, methodology, and results used by MTNHP in 2016 to assign C-values to 316 plant taxa (species, varieties, subspecies, or hybrids) listed on the 2014 U.S. Army Corps of Engineers (COE) Regional Wetland Plant Lists for the Western Mountains, Valleys, and Coast; Arid West; and Great Plains. This report is Part III in the process of assigning C-values to Montana's vascular plants. In 2017 the expert panel evaluated 312 plant species of which most occur in upland habitats or are common and widespread in Montana. The panel also re-evaluated about 100 species assigned C-values by the 2005 panel. In addition, the MTNHP Botanist re-evaluated the remaining list of plant taxa that lacked C-values, in order to determine their presence and if enough information might be available for assigning a value. In the process these species were also re-examined to determine their origin (native or exotic) in Montana. Overall, 1,056 plant taxa were examined in 2017.

Of the 1,056 plant taxa (species, varieties, subspecies, or hybrids) known, reported, or previously documented in literature to occur in Montana: a) 416 plants were assigned a C-value, b) 137 species were not assigned a C-value because of insufficient information, c) 355 taxa are subspecies or varieties that are not assigned a C-value, d) 90 species were not assigned a C-value because they are reported to occur in Montana, have taxonomic problems, or are hybrids, and e) 58 species were not assigned a C-value because they are not present (at this time) in Montana.

In Montana 477 plant species that likely have sufficient information remain without a C-value. From a status perspective, approximately half of them are currently categorized as Species of Concern, Potential Species of Concern, or Status Under Review. From a habitat perspective, most of them occur in the montane to alpine zones or in grasslands.

## 1.0 INTRODUCTION

Conservation of our species and landscapes is accomplished through land preservation, habitat restoration, and development of effective management techniques. Species and land conservation requires the ability to assess natural areas. The Floristic Quality Assessment Index (FQAI) is a tool that uses plants to make standardized comparisons among open land areas, to set conservation priorities, to monitor project areas, and to restore habitats (Wilhelm and Masters 1995). A key component of using FQAI is to assign a Coefficient of Conservatism (C-) value to an individual plant species that is specific to a defined geography. This report is part III in the process for assigning Coefficient of Conservatism values to Montana's plants. It outlines the practical uses of FQAI, defines the process used by the Montana Natural Heritage Program (MTNHP) to assign C-values to plants in Montana, and provides the full C-value data-set.

It is commonly accepted that plants and animals occupy habitats to which they are adapted (Wilhelm and Masters 1995). European settlement in North America has resulted in large and rapid changes to our native biological systems and processes. These changes include: a) the loss of conservative plants, those species that co-occur (to create diversity) and are suited to long-term inhabitancy, and b) the increase of exotic species that perpetuate with catastrophic disturbance or cultural activities. As a result, landscapes in Montana are a mosaic of intact systems and fragmented lands in varying states of degradation. Plants exhibit varying degrees of tolerance to disturbance and also display varying degrees of affinity (or fidelity) to a specific habitat integrity (i.e., the state of being an unimpaired habitat) (Wilhelm and Masters 1995).

For a given geography, the C-value reflects the plant species' tolerance to natural and/or human disturbance and its fidelity to a habitat, and is scaled from 0 to 10. Plants assigned a value of 0 are habitat generalists that respond positively to disturbance while plants assigned a value of 10 occur in very specialized habitats and are intolerant of disturbance. The assigned C-value is not a reflection of the plant's density, apparent dominance, or frequency within the defined geographical area (Wilhelm and Masters 1995). Collectively, C-values are incorporated into community-based site assessment methods, such as FQAI (Zomlefer et al. 2013). The FQAI method is used by government agencies and private consulting firms to: 1) identify natural areas, 2) facilitate comparisons among different sites (regardless of the habitat type), 3) conduct long-term monitoring of the quality of remnant lands, and 4) guide restoration efforts (Zomlefer et al. 2013; Wilhelm and Masters 1995).

Government agencies and private consulting firms have also used assessment methods based on FQAI to monitor wetland conditions in compliance with Section 305(b) of the Clean Water Act (Bernthal et al. 2003; Herman et al. 2006; Taft et al. 1997; USEPA 2012). Organizations are also using FQAI and C-values in long-term ecological inventories, to develop baseline conditions, and to set habitat or vegetation targets in restoration projects. To facilitate the use of FQAI and C-value indices in Montana, it is necessary to develop C-values that reflect the species' response to environmental conditions in Montana. In 2004-2005, 2015, 2016, and 2017 the MTNHP Botanist assembled a panel of botanical and ecological experts to assign C-values to Montana's plant species. The emphasis prior to 2017 was to rank plants listed on the U.S. Army Corps of Engineers National Wetland Plant List, other wetland, and exotic species. The 2017 process focused on ranking upland plants, particularly the more common or widespread species.

This project supports the primary objective of the Clean Water Act, which is to “maintain and restore the chemical, physical, and biological integrity of the Nation’s waters”, including wetlands (Federal Water Pollution Control Act, Public Law 92-500). To date, the C-value process in Montana has assessed approximately 2,666 plant taxa. The *Coefficient of Conservatism Rankings for the Flora of Montana: Part I* report specifically details the process, methodology, and results used in 2004-2005 and 2015. The *Coefficient of Conservatism Rankings for the Flora of Montana: Part II* and *Part III* provides the methods used in 2016 and 2017, respectively, and the results across all years.

## 2.0 METHODS

### 2.1 Expert Panel

The standard methodology for assigning C-values uses an expert panel of botanists and ecologists familiar with the flora in question (Jones 2005; Rocchio 2007; and Zomlefer et al. 2013). In 2017, the MTNHP Botanist assembled a panel of botanical and ecological experts with field-based knowledge of Montana’s flora (**Table 1**). The emphasis in 2017 was to review all plants that lacked a C-value, are known or reported to occur in Montana, or are upland species (particularly if more common or widely distributed). The process also allowed the panel to re-examine the individual species’ presence in Montana and its probable origin (native or exotic in Montana).

### 2.2 Coefficient of Conservatism Values

The list of 312 plant species assessed in 2017 mostly reflected common or widely distributed upland species and was given to each panel member to review independently, prior to the meeting (**Table 4a** in **Appendix A**). The panel met on October 11, 2017 to discuss each species collectively as a group and to work it through the *Dichotomous Key for Coefficient of Conservatism Rankings* (Zomlefer et al. 2013) (**Table 2**; **Figure B-1** in **Appendix B**). Criteria developed and agreed upon by the 2015 and 2016 panels was reviewed (**Table 3**). These additional criteria reflect Montana’s geography and helped improve consistency in assigning C-values across species and years (**Table 3**). Additional resources used included the knowledge of individual panel members for a particular species, published materials pertinent to vascular plants in Montana, and several on-line floras or databases (Consortium of Pacific Northwest Herbaria [University of Washington 2015], PLANTS database [USDA-NRCS 2016], Flora of North America [Flora of North America Editorial Committee, eds. 1993+], and MTNHP Botany Database). The panel did not assign C-values to species that lacked sufficient information on distribution, habitat association, and/or tolerance to disturbance that is pertinent to Montana. In

addition, the panel questioned some of the C-values assigned in 2005, and found some mistakes in the use of C-values 0 and 1. Therefore, about 100 species were re-evaluated by the panel (**Table 4b** in **Appendix A**).

In a separate effort the remaining taxa that lacked C-values were evaluated by the MTNHP Botanist to determine the plant's State presence/absence, potential for taxonomy problems, and if adequate information for assigning a C-value was likely available. Plant taxa determined to be absent in the State were categorized as 'absent'. Plant taxa that are taxonomically problematic in Montana and hybrids were not assigned a C-value and categorized as 'not applicable'. Plants with less than four herbarium collections or that lacked information on habitats or their response to disturbance were not assigned a C-value and categorized as 'insufficient information'. Plant taxa at the variety and subspecies levels were mostly not assigned a C-value because information is usually not known or not documented well.

NON-NATIVE MONTANA SPECIES	
0	invasive
1	relatively benign
NATIVE MONTANA SPECIES	
<b>Opportunistic, Broad Ecological Tolerance</b>	
2	exhibits a broad range of ecological tolerance and is more or less restricted to areas of human disturbance
<b>Non-Opportunistic, Intermediate Ecological Tolerance</b>	
3	exhibits an intermediate range of ecological tolerance, typifies a stable phase of a native community, and thrives and/or persists under natural or human disturbance
4	exhibits an intermediate range of ecological tolerance, typifies a stable phase of a native community, and persists but does not thrive with some natural or human disturbance
5	exhibits an intermediate range of ecological tolerance, typifies a stable phase of a native community, and persists but does not thrive with a little natural or human disturbance
<b>Non-Opportunistic, Narrow Ecological Tolerance</b>	
6	exhibits a moderate fidelity to a more or less narrow range of ecological tolerance, typifies a stable or near climax community, and tolerates limited natural or human disturbance (unless surrogate for fire or other natural disturbance)
7	exhibits a moderate fidelity to a somewhat narrow range of ecological tolerance, typifies a stable or near climax community, and does not tolerate disturbance
8	exhibits a moderate fidelity to a narrow range of ecological tolerance, typifies a stable or near climax community, and does not tolerate disturbance
9	exhibits a high fidelity to a narrow range of ecological tolerance, typifies a stable or near climax community, and does not tolerate disturbance
10	exhibits a very high fidelity to a very narrow range of ecological tolerance that typifies a stable or near climax community and does not tolerate disturbance

**Table 3. Criteria used by the 2015 - 2017 Montana panels to help assign C-values more consistently.**

Montana Criteria Used to Assign C-values
<ul style="list-style-type: none"> <li>Panel agreed that in Montana a species found in dry, upland habitat does not signify a “narrow range of ecological tolerance” (second (d) couplet), unless it is a very specific type of dry, upland habitat. In Montana an example of a dry, upland habitat that qualifies as a “narrow range of ecological tolerance” is a ‘sand blow-out’ whereby wind erodes areas of sandy soil creating a substrate suitable for particular species.</li> <li>Panel agreed that in Montana a species found in wetland habitat may signify a “narrow range of ecological tolerance” (second (d) couplet). Native plants that are mostly found in very wet to always wet habitats (often rated by the COE as facultative-wet (FACW) or obligate-wet (OBL)) and are not opportunistic often will signify a “narrow range of ecological tolerance”. For wetland associated species in Montana, the range of ecological tolerance becomes narrower as the species’ requirement for being wet increases. Thus, an obligate (OBL) wetland plant often has a narrower ecological tolerance than does a facultative-wet (FACW) plant than does a facultative (FAC) plant.</li> <li>Although wetland habitat may signify a "narrow range of ecological tolerance", the level of disturbance that the plant requires or tolerates could place it into the “intermediate range of ecological tolerance (first [d] couplet).</li> <li>In Montana, alpine habitat could be viewed as unique or as common. Many plants require alpine and/or sub-alpine conditions, yet this general habitat type is fairly common in Montana. Panel agreed that that a species found in alpine habitat did not always signify a “narrow range of ecological tolerance” (second (d) couplet), unless it is a very specific type of habitat or ecological condition within the alpine or subalpine zones.</li> <li>Panel agreed that ‘alkaline soils’ represent a more ecologically narrow condition in Montana, and will usually classify the species into the second (d) couplet of the key.</li> <li>Panel felt the plant’s reproductive strategy does indicate something about its resilience to disturbance. A rhizomatous plant might tolerate disturbance better than a taprooted plant. An annual plant might require disturbance to maintain its population.</li> <li>Panel felt it was usefully to examine life history characteristics when deciding between close C-values. How does the plant reproduce (vegetatively, rhizomes, seeds, etc.) with a prolonged change in hydrology? How does the plant regenerate if disturbed? Is the plant also limited by pollinators or climatic conditions to reproduce?</li> <li>Panel decided that a hybrid species will not be assigned a C-value at this time. Lots of plants hybridize, but the characteristics of a hybrid are often not captured in herbarium specimens and botanical keys. Therefore, the response to disturbance or requirement for habitat is often not known. Most people lack the observational skill-set to recognize hybrids. Exceptions to this criterion were made for particular hybrids.</li> <li>Subspecies and varieties are usually not assigned a c-value because information on habitat and disturbance tolerance is often not available at that taxa level.</li> <li>Panel usually did not assign a C-value to a plant that has 1-3 collections in Montana. Plants with few collections often have insufficient information to determine how the species responds to disturbance and/or what it requires for habitat.</li> <li>Panel usually did not assign a C-value to a species represented only from very old collections. Plants collected from a very long time ago may no longer be present and are not observed enough to really know how the species tolerates disturbance and/or what it requires for habitat.</li> </ul>

## 3.0 SUMMARY

In 2017, 1,056 plant taxa (species, varieties, subspecies, or hybrids) known, reported, or previously documented in literature to occur in Montana were evaluated. Of the 1,056 plants:

- 416 plants were assigned a C-value because they are well documented in Montana.
- 137 species were not assigned a C-value and categorized as ‘insufficient information’. The Montana observation records are too few, habitat information is too vague, and/or their response to disturbance is not understood.
- 355 taxa were not assigned a C-value and categorized as ‘insufficient information’. These are subspecies or varieties with little relevant information.
- 90 species were not assigned a C-value and categorized as ‘not applicable’. These species are either reported to occur in Montana but no specimens have been found and verified, or have taxonomic problems that make evaluating the species difficult, or are hybrids.
- 58 species were not assigned a C-value because documented research revealed they are not present (at this time) in Montana.

The 2017 panel also reviewed the origin of these plant taxa in Montana. Discussions within the panel, a review of literature and on-line databases, and an examination of herbaria specimens resulted in a change for approximately 10 species.

Collectively across the years (2005, 2015-2017) 2,666 vascular plant taxa have been evaluated in Montana (**Table 5 in Appendix C**). Of the 2,666 taxa, 1,930 taxa (3 subspecies and 1,927 species) have assigned C-values ranging from 0 to 10, 557 taxa have ‘insufficient information’ for assigning a C-value, 94 are deemed ‘not applicable’ for assigning a C-value, and 85 were determined to be absent in Montana. This leaves 477 vascular plant species for which information is likely available in need of a C-value. Roughly, half of these plants are currently designated as Species of Concern, Potential Species of Concern, or Status Under Review. From a habitat perspective, a significant number are found in the montane to alpine zones or in grasslands.

The Montana Natural Heritage Botany Program has and will continue to house and maintain the C-value dataset (processes, database, and documentation). The methods, species, synonyms, and their assigned C-values are available on the MTNHP website (<http://mtnhp.org/>). The Montana C-Value data-set is available in Microsoft Excel spreadsheet format on the MTNHP website. Future funding opportunities will continue to be explored in order to complete the assignment of C-values for the remaining approximate 477 plant species (**Table 5 in Appendix B**).

**Table 5. Montana vascular plants with 2005 and 2015-2017 (revised) origins and C-values.**

Family	Scientific Name	Common Name	Origin	C-Value
Pinaceae	<i>Abies grandis</i>	Grand Fir	Native	6
Pinaceae	<i>Abies lasiocarpa</i>	Subalpine Fir	Native	4
Nyctaginaceae	<i>Abronia fragrans</i>	Fragrant White Sand-verbena	Native	
Malvaceae	<i>Abutilon theophrasti</i>	Velvet-leaf	Exotic	1
Aceraceae	<i>Acer glabrum</i>	Rocky Mountain Maple	Native	4
Aceraceae	<i>Acer grandidentatum</i>	Bigtooth Maple	Unknown/Undetermined	Insuff. Info.
Aceraceae	<i>Acer negundo</i>	Box-elder	Native	3
Aceraceae	<i>Acer platanoides</i>	Norway Maple	Exotic	1
Asteraceae	<i>Achillea millefolium</i>	Common Yarrow	Native	3
Asteraceae	<i>Achillea nobilis</i>	Noble Yarrow	Exotic	1
Asteraceae	<i>Achillea ptarmica</i>	Sneezeweed	Exotic	1
Asteraceae	<i>Achillea sibirica</i>	Siberian Yarrow	Unknown/Undetermined	Insuff. Info.
Ranunculaceae	<i>Aconitum columbianum</i>	Columbia Monkshood	Native	5
Acoraceae	<i>Acorus americanus</i>	Sweetflag	Native	9
Acoraceae	<i>Acorus calamus</i>	Sweetflag	Unknown/Undetermined	Absent in MT
Asteraceae	<i>Acroptilon repens</i>	Russian Knapweed	Exotic	0
Ranunculaceae	<i>Actaea rubra</i>	Red Baneberry	Native	7
Asteraceae	<i>Adenocaulon bicolor</i>	American Trailplant	Native	6
Pteridaceae	<i>Adiantum aleuticum</i>	Maidenhair Fern	Native	7
Ranunculaceae	<i>Adonis aestivalis</i>	Summer Adonis	Exotic	1
Adoxaceae	<i>Adoxa moschatellina</i>	Musk-root	Native	9
Poaceae	<i>Aegilops cylindrica</i>	Jointed Goatgrass	Exotic	1
Lamiaceae	<i>Agastache cusickii</i>	Cusick's Horsemint	Native	
Lamiaceae	<i>Agastache foeniculum</i>	Lavender Hyssop	Native	
Lamiaceae	<i>Agastache urticifolia</i>	Nettle-leaf Giant-hyssop	Native	4
Asteraceae	<i>Ageratina occidentalis</i>	Western Joe-pye-weed	Native	
Asteraceae	<i>Agoseris aurantiaca</i>	Orange Agoseris	Native	5
Asteraceae	<i>Agoseris aurantiaca</i> var. <i>purpurea</i>	Orange Agoseris	Native	Insuff. Info.
Asteraceae	<i>Agoseris glauca</i>	Pale Agoseris	Native	4
Asteraceae	<i>Agoseris glauca</i> var. <i>dasycephala</i>	Pale Agoseris	Native	Insuff. Info.
Asteraceae	<i>Agoseris glauca</i> var. <i>glauca</i>	Pale Agoseris	Native	Insuff. Info.
Asteraceae	<i>Agoseris grandiflora</i>	Large-flower Agoseris	Native	
Asteraceae	<i>Agoseris heterophylla</i>	Annual Agoseris	Native	
Asteraceae	<i>Agoseris lackschewitzii</i>	Pink Agoseris	Native	6
Asteraceae	<i>Agoseris parviflora</i>	Steppe Agoseris	Native	4
Rosaceae	<i>Agrimonia gryposepala</i>	Tall Hairy Groovebur	Native	6
Rosaceae	<i>Agrimonia striata</i>	Woodland Agrimony	Native	4
Poaceae	<i>Agropyron cristatum</i>	Crested Wheatgrass	Exotic	0
Caryophyllaceae	<i>Agrostemma githago</i>	Common Corncockle	Exotic	1

Family	Scientific Name	Common Name	Origin	C-Value
Poaceae	<i>Agrostis capillaris</i>	Colonial Bentgrass	Exotic	1
Poaceae	<i>Agrostis exarata</i>	Spike Bentgrass	Native	4
Poaceae	<i>Agrostis gigantea</i>	Redtop	Exotic	0
Poaceae	<i>Agrostis humilis</i>	Mountain Bentgrass	Native	4
Poaceae	<i>Agrostis idahoensis</i>	Idaho Bentgrass	Native	4
Poaceae	<i>Agrostis mertensii</i>	Northern Bentgrass	Native	6
Poaceae	<i>Agrostis oregonensis</i>	Oregon Bentgrass	Native	6
Poaceae	<i>Agrostis pallens</i>	Leafy Bentgrass	Native	6
Poaceae	<i>Agrostis scabra</i>	Rough Bentgrass	Native	4
Poaceae	<i>Agrostis stolonifera</i>	Creeping Bentgrass	Exotic	0
Poaceae	<i>Agrostis thurberiana</i>	Thurber's Bentgrass	Native	4
Poaceae	<i>Agrostis variabilis</i>	Variable Bentgrass	Native	4
Lamiaceae	<i>Ajuga reptans</i>	Common Bugle	Exotic	1
Malvaceae	<i>Alcea rosea</i>	Hollyhock	Exotic	1
Rosaceae	<i>Alchemilla xanthochlora</i>	Common Lady's-mantle	Exotic	1
Alismataceae	<i>Alisma gramineum</i>	Narrow-leaf Water-plantain	Native	6
Alismataceae	<i>Alisma triviale</i>	Northern Water-plantain	Native	6
Liliaceae	<i>Allium acuminatum</i>	Tapertip Onion	Native	
Liliaceae	<i>Allium brandegeei</i>	Brandegee's Onion	Unknown/Undetermined	Insuff. Info.
Liliaceae	<i>Allium brevistylum</i>	Short-stem Onion	Native	6
Liliaceae	<i>Allium cernuum</i>	Nodding Onion	Native	4
Liliaceae	<i>Allium columbianum</i>	Columbia Onion	Native	
Liliaceae	<i>Allium fibrillum</i>	Fringed Onion	Native	
Liliaceae	<i>Allium geyeri</i>	Geyer's Onion	Native	4
Liliaceae	<i>Allium geyeri</i> var. <i>geyeri</i>	Geyer's Onion	Native	Insuff. Info.
Liliaceae	<i>Allium geyeri</i> var. <i>tenerum</i>	Geyer's Bulbil Onion	Native	Insuff. Info.
Liliaceae	<i>Allium parvum</i>	Small Onion	Native	
Liliaceae	<i>Allium schoenoprasum</i>	Chives	Native	6
Liliaceae	<i>Allium simillimum</i>	Dwarf Onion	Native	Insuff. Info.
Liliaceae	<i>Allium textile</i>	White Wild Onion	Native	4
Ericaceae	<i>Allotropa virgata</i>	Candystick	Native	
Asteraceae	<i>Almutaster pauciflorus</i>	Alkali Marsh Aster	Native	7
Betulaceae	<i>Alnus incana</i>	Speckled Alder	Native	6
Betulaceae	<i>Alnus rubra</i>	Red Alder	Native	Insuff. Info.
Betulaceae	<i>Alnus viridis</i>	Green Alder	Native	6
Poaceae	<i>Alopecurus aequalis</i>	Short-awn Foxtail	Native	4
Poaceae	<i>Alopecurus arundinaceus</i>	Creeping Foxtail	Exotic	0
Poaceae	<i>Alopecurus carolinianus</i>	Tufted Foxtail	Native	4
Poaceae	<i>Alopecurus geniculatus</i>	Water Foxtail	Exotic	1
Poaceae	<i>Alopecurus magellanicus</i>	Mountain Foxtail	Native	6
Poaceae	<i>Alopecurus pratensis</i>	Meadow Foxtail	Exotic	0
Brassicaceae	<i>Alyssum alyssoides</i>	Pale Alyssum	Exotic	0

Family	Scientific Name	Common Name	Origin	C-Value
Brassicaceae	<i>Alyssum desertorum</i>	Desert Alyssum	Exotic	0
Brassicaceae	<i>Alyssum murale</i>	Yellow-tuft	Exotic	Absent in MT
Brassicaceae	<i>Alyssum simplex</i>	Alyssum	Exotic	0
Amaranthaceae	<i>Amaranthus albus</i>	White Amaranth	Likely Exotic	1
Amaranthaceae	<i>Amaranthus arenicola</i>	Sandhills Amaranth	Likely Exotic	1
Amaranthaceae	<i>Amaranthus blitoides</i>	Prostrate Amaranth	Native	2
Amaranthaceae	<i>Amaranthus californicus</i>	California Amaranth	Native	6
Amaranthaceae	<i>Amaranthus hybridus</i>	Smooth Amaranth	Exotic	1
Amaranthaceae	<i>Amaranthus powellii</i>	Green Amaranth	Unknown/Undetermined	
Amaranthaceae	<i>Amaranthus retroflexus</i>	Redroot Amaranth	Native	2
Amaranthaceae	<i>Amaranthus tuberculatus</i>	Roughfruit Amaranth	Exotic	1
Asteraceae	<i>Ambrosia acanthicarpa</i>	Flat-spine Ragweed	Native	
Asteraceae	<i>Ambrosia artemisiifolia</i>	Annual Ragweed	Native	4
Asteraceae	<i>Ambrosia psilostachya</i>	Western Ragweed	Native	4
Asteraceae	<i>Ambrosia tomentosa</i>	Skeletonleaf Ragweed	Native	
Asteraceae	<i>Ambrosia trifida</i>	Giant Ragweed	Native	2
Rosaceae	<i>Amelanchier alnifolia</i>	Saskatoon Serviceberry	Native	4
Rosaceae	<i>Amelanchier humilis</i>	Running Serviceberry	Unknown/Undetermined	NA
Rosaceae	<i>Amelanchier pumila</i>	Dwarf Serviceberry	Unknown/Undetermined	NA
Rosaceae	<i>Amelanchier utahensis</i>	Utah Serviceberry	Native	4
Orchidaceae	<i>Amerorchis rotundifolia</i>	Round-leaved Orchis	Native	9
Lythraceae	<i>Ammannia robusta</i>	Scarlet Ammannia	Native	6
Fabaceae	<i>Amorpha canescens</i>	Lead Plant	Native	
Cyperaceae	<i>Amphiscirpus nevadensis</i>	Nevada Bulrush	Native	9
Boraginaceae	<i>Amsinckia lycopsoides</i>	Bugloss Fiddle-neck	Native	Insuff. Info.
Boraginaceae	<i>Amsinckia menziesii</i>	Small-flower Fiddle-neck	Native	2
Myrsinaceae	<i>Anagallis arvensis</i>	Scarlet Pimpernel	Exotic	1
Asteraceae	<i>Anaphalis margaritacea</i>	Pearly Everlasting	Native	3
Boraginaceae	<i>Anchusa arvensis</i>	Small Bugloss	Exotic	1
Boraginaceae	<i>Anchusa azurea</i>	Italian Bugloss	Exotic	1
Boraginaceae	<i>Anchusa officinalis</i>	Common Bugloss	Exotic	1
Poaceae	<i>Andropogon gerardii</i>	Big Bluestem	Native	4
Poaceae	<i>Andropogon hallii</i>	Sand Bluestem	Native	
Primulaceae	<i>Androsace chamaejasme</i>	Sweet-flower Rock-jasmine	Native	7
Primulaceae	<i>Androsace filiformis</i>	Filiform Rockjasmine	Native	4
Primulaceae	<i>Androsace occidentalis</i>	Western Rock-jasmine	Native	3
Primulaceae	<i>Androsace septentrionalis</i>	Pygmy-flower Rock-jasmine	Native	3
Ranunculaceae	<i>Anemone canadensis</i>	Canada Anemone	Native	4
Ranunculaceae	<i>Anemone cylindrica</i>	Long-fruited Anemone	Native	4
Ranunculaceae	<i>Anemone drummondii</i>	Drummond's Anemone	Native	5
Ranunculaceae	<i>Anemone multifida</i>	Cut-leaved Anemone	Native	4
Ranunculaceae	<i>Anemone multifida</i> var. <i>multifida</i>	Cut-leaved Anemone	Native	Insuff. Info.

Family	Scientific Name	Common Name	Origin	C-Value
Ranunculaceae	<i>Anemone multifida</i> var. <i>tonensis</i>	Teton Cut-leaved Anemone	Native	Insuff. Info.
Ranunculaceae	<i>Anemone occidentalis</i>	Western Pasqueflower	Native	
Ranunculaceae	<i>Anemone parviflora</i>	Small-flower Anemone	Native	6
Ranunculaceae	<i>Anemone patens</i>	Pasqueflower	Native	4
Ranunculaceae	<i>Anemone piperi</i>	Piper's Anemone	Native	5
Apiaceae	<i>Angelica arguta</i>	Lyall's Angelica	Native	5
Apiaceae	<i>Angelica dawsonii</i>	Dawson's Angelica	Native	7
Apiaceae	<i>Angelica pinnata</i>	Small-leaf Angelica	Native	4
Apiaceae	<i>Angelica roseana</i>	Rock Angelica	Native	
Asteraceae	<i>Antennaria alpina</i>	Alpine Pussytoes	Native	9
Asteraceae	<i>Antennaria anaphaloides</i>	Tall Pussytoes	Native	4
Asteraceae	<i>Antennaria aromatica</i>	Aromatic Pussytoes	Native	7
Asteraceae	<i>Antennaria corymbosa</i>	Meadow Pussytoes	Native	6
Asteraceae	<i>Antennaria densifolia</i>	Dense-leaved Pussytoes	Native	9
Asteraceae	<i>Antennaria dimorpha</i>	Low Pussytoes	Native	4
Asteraceae	<i>Antennaria howellii</i>	Howell's Pussytoes	Native	4
Asteraceae	<i>Antennaria howellii</i> ssp. <i>neodioca</i>	Northern Pussytoes	Native	4
Asteraceae	<i>Antennaria howellii</i> ssp. <i>petaloidea</i>		Native	Insuff. Info.
Asteraceae	<i>Antennaria lanata</i>	Woolly Pussytoes	Native	7
Asteraceae	<i>Antennaria luzuloides</i>	Rush Pussytoes	Native	4
Asteraceae	<i>Antennaria media</i>	Rocky Mountain Pussytoes	Native	5
Asteraceae	<i>Antennaria microphylla</i>	Littleleaf Pussytoes	Native	4
Asteraceae	<i>Antennaria monocephala</i>	Single-head Pussytoes	Native	8
Asteraceae	<i>Antennaria neglecta</i>	Field Pussytoes	Native	4
Asteraceae	<i>Antennaria parvifolia</i>	Nuttall's Pussytoes	Native	4
Asteraceae	<i>Antennaria plantaginifolia</i>	Plantain-leaf Pussytoes	Unknown/Undetermined	Absent in MT
Asteraceae	<i>Antennaria pulcherrima</i>	Showy Pussytoes	Native	7
Asteraceae	<i>Antennaria racemosa</i>	Racemose Pussytoes	Native	4
Asteraceae	<i>Antennaria rosea</i>	Rosy Pussytoes	Native	4
Asteraceae	<i>Antennaria umbrinella</i>	Umber Pussytoes	Native	4
Asteraceae	<i>Anthemis arvensis</i>	Corn Chamomile	Exotic	1
Asteraceae	<i>Anthemis cotula</i>	Mayweed	Exotic	1
Asteraceae	<i>Anthemis tinctoria</i>	Golden Chamomile	Exotic	1
Poaceae	<i>Anthoxanthum hirtum</i>	Northern Sweet Grass	Native	8
Poaceae	<i>Anthoxanthum odoratum</i>	Sweet Vernalgrass	Exotic	1
Apiaceae	<i>Anthriscus cerefolium</i>	Common Chervil	Exotic	1
Poaceae	<i>Apera interrupta</i>	Dense Silky Bentgrass	Exotic	1
Apocynaceae	<i>Apocynum androsaemifolium</i>	Spreading Dogbane	Native	3
Apocynaceae	<i>Apocynum cannabinum</i>	Clasping-leaf Dogbane	Native	4
Apocynaceae	<i>Apocynum x floribundum</i>	Hybrid	Unknown/Undetermined	NA
Ranunculaceae	<i>Aquilegia brevistyla</i>	Short-styled Columbine	Native	
Ranunculaceae	<i>Aquilegia coerulea</i>	Colorado Columbine	Native	6

Family	Scientific Name	Common Name	Origin	C-Value
Ranunculaceae	<i>Aquilegia coerulea</i> var. <i>ochroleuca</i>	White Colorado Columbine	Native	Insuff. Info.
Ranunculaceae	<i>Aquilegia flavescens</i>	Yellow Columbine	Native	5
Ranunculaceae	<i>Aquilegia formosa</i>	Sitka Columbine	Native	6
Ranunculaceae	<i>Aquilegia jonesii</i>	Jones' Columbine	Native	
Brassicaceae	<i>Arabidopsis lyrata</i>	Lyre-leaf Rockcress	Native	Insuff. Info.
Brassicaceae	<i>Arabidopsis lyrata</i> ssp. <i>kamchatica</i>	Kamchatica Rockcress	Native	Insuff. Info.
Brassicaceae	<i>Arabidopsis thaliana</i>	Wall-cress	Exotic	1
Brassicaceae	<i>Arabis demissa</i> var. <i>languida</i>	Daggett Rockcress	Native	Insuff. Info.
Brassicaceae	<i>Arabis hirsuta</i>	Western Hairy Rockcress	Native	3
Brassicaceae	<i>Arabis holboellii</i>	Holboell's Rockcress	Native	NA
Brassicaceae	<i>Arabis nuttallii</i>	Nuttall's Rockcress	Native	4
Araliaceae	<i>Aralia nudicaulis</i>	Wild Sarsaparilla	Native	5
Viscaceae	<i>Arceuthobium americanum</i>	American Dwarf-mistletoe	Native	Insuff. Info.
Viscaceae	<i>Arceuthobium campylopodium</i>	Western Dwarf-mistletoe	Native	Insuff. Info.
Viscaceae	<i>Arceuthobium cyanocarpum</i>	Limber Pine Dwarf-mistletoe	Native	Insuff. Info.
Viscaceae	<i>Arceuthobium douglasii</i>	Douglas-fir Dwarf-mistletoe	Native	Insuff. Info.
Viscaceae	<i>Arceuthobium laricis</i>	Larch Dwarf-mistletoe	Native	Insuff. Info.
Asteraceae	<i>Arctium lappa</i>	Greater Burdock	Exotic	0
Asteraceae	<i>Arctium minus</i>	Lesser Burdock	Exotic	0
Ericaceae	<i>Arctostaphylos patula</i>	Greenleaf Manzanita	Native	Insuff. Info.
Ericaceae	<i>Arctostaphylos uva-ursi</i>	Kinnikinnick	Native	4
Caryophyllaceae	<i>Arenaria aculeata</i>	Spiny Sandwort	Native	
Caryophyllaceae	<i>Arenaria capillaris</i>	Fescue Sandwort	Native	
Caryophyllaceae	<i>Arenaria congesta</i>	Capitate Sandwort	Native	4
Caryophyllaceae	<i>Arenaria congesta</i> var. <i>cephaloidea</i>	Sharptip Sandwort	Native	Insuff. Info.
Caryophyllaceae	<i>Arenaria congesta</i> var. <i>congesta</i>	Ballhead Sandwort	Native	Insuff. Info.
Caryophyllaceae	<i>Arenaria congesta</i> var. <i>lithophila</i>	Rock-loving Sandwort	Native	Insuff. Info.
Caryophyllaceae	<i>Arenaria hookeri</i>	Hooker's Sandwort	Native	4
Caryophyllaceae	<i>Arenaria kingii</i>	King's Arenaria	Native	
Caryophyllaceae	<i>Arenaria serpyllifolia</i>	Thymeleaf Sandwort	Exotic	0
Papaveraceae	<i>Argemone polyanthemos</i>	White Prickly-poppy	Unknown/Undetermined	
Rosaceae	<i>Argentina anserina</i>	Silverweed cinquefoil	Native	4
Poaceae	<i>Aristida purpurea</i>	Purple Three-awn Grass	Native	3
Asteraceae	<i>Arnica amplexicaulis</i>	Clasping Arnica	Native	5
Asteraceae	<i>Arnica angustifolia</i>	Narrowleaf Arnica	Native	6
Asteraceae	<i>Arnica chamissonis</i>	Leafy Arnica	Native	5

Family	Scientific Name	Common Name	Origin	C-Value
Asteraceae	<i>Arnica chamissonis</i> var. <i>maguirei</i>		Unknown/Undetermined	Insuff. Info.
Asteraceae	<i>Arnica cordifolia</i>	Heart-leaved Arnica	Native	4
Asteraceae	<i>Arnica fulgens</i>	Hillside Arnica	Native	4
Asteraceae	<i>Arnica latifolia</i>	Mountain Arnica	Native	4
Asteraceae	<i>Arnica latifolia</i> var. <i>gracilis</i>	Smallhead Arnica	Native	Insuff. Info.
Asteraceae	<i>Arnica latifolia</i> var. <i>latifolia</i>		native	Insuff. Info.
Asteraceae	<i>Arnica longifolia</i>	Long-leaf Arnica	Native	7
Asteraceae	<i>Arnica mollis</i>	Hairy Arnica	Native	6
Asteraceae	<i>Arnica parryi</i>	Nodding Arnica	Native	4
Asteraceae	<i>Arnica rydbergii</i>	Subalpine Arnica	Native	5
Asteraceae	<i>Arnica sororia</i>	Twin Arnica	Native	
Asteraceae	<i>Arnica x diversifolia</i>	Rayless Arnica	Native	5
Poaceae	<i>Arrhenatherum elatius</i>	Tall Oatgrass	Exotic	0
Asteraceae	<i>Artemisia absinthium</i>	Common Wormwood	Exotic	0
Asteraceae	<i>Artemisia annua</i>	Annual Wormwood	Exotic	1
Asteraceae	<i>Artemisia arbuscula</i>	Dwarf Sagebrush	Native	6
Asteraceae	<i>Artemisia arbuscula</i> ssp. <i>arbuscula</i>	Dwarf Sagebrush	Native	Insuff. Info.
Asteraceae	<i>Artemisia arbuscula</i> ssp. <i>longiloba</i>	Alkali Sagebrush	Native	Insuff. Info.
Asteraceae	<i>Artemisia biennis</i>	Biennial Wormwood	Native	3
Asteraceae	<i>Artemisia campestris</i>	Field Sagewort	Native	4
Asteraceae	<i>Artemisia campestris</i> ssp. <i>borealis</i>	Boreal Field Sagewort	Native	Insuff. Info.
Asteraceae	<i>Artemisia campestris</i> ssp. <i>caudata</i>	Field Sagewort	Native	Insuff. Info.
Asteraceae	<i>Artemisia campestris</i> ssp. <i>pacifica</i>	Western Field Sagewort	Native	Insuff. Info.
Asteraceae	<i>Artemisia cana</i>	Silver Sagebrush	Native	4
Asteraceae	<i>Artemisia cana</i> ssp. <i>cana</i>	Silver Sagebrush	Native	Insuff. Info.
Asteraceae	<i>Artemisia cana</i> ssp. <i>viscidula</i>	Silver Sagebrush	Native	Insuff. Info.
Asteraceae	<i>Artemisia dracunculus</i>	Tarragon	Native	3
Asteraceae	<i>Artemisia frigida</i>	Fringed Sage	Native	3
Asteraceae	<i>Artemisia lindleyana</i>	Columbia River Wormwood	Native	7
Asteraceae	<i>Artemisia longifolia</i>	Longleaf Wormwood	Native	6
Asteraceae	<i>Artemisia ludoviciana</i>	White Sagebrush	Native	4
Asteraceae	<i>Artemisia ludoviciana</i> ssp. <i>candicans</i>	White Sagebrush	Native	Insuff. Info.
Asteraceae	<i>Artemisia ludoviciana</i> ssp. <i>incompta</i>	White Sagebrush	Native	Insuff. Info.
Asteraceae	<i>Artemisia ludoviciana</i> ssp. <i>ludoviciana</i>	White Sagebrush	Native	Insuff. Info.
Asteraceae	<i>Artemisia michauxiana</i>	Michaux's Wormwood	Native	5
Asteraceae	<i>Artemisia norvegica</i>	Boreal Wormwood	Native	Absent in MT

Family	Scientific Name	Common Name	Origin	C-Value
Asteraceae	<i>Artemisia nova</i>	Black Sagebrush	Native	4
Asteraceae	<i>Artemisia pedatifida</i>	Bird's-foot Sagebrush	Native	6
Asteraceae	<i>Artemisia porteri</i>	Porter's Sagebrush	Unknown/Undetermined	NA
Asteraceae	<i>Artemisia rigida</i>	Scabland Sagebrush	Unknown/Undetermined	NA
Asteraceae	<i>Artemisia scopulorum</i>	Alpine Sagebrush	Native	
Asteraceae	<i>Artemisia spinescens</i>	Budsage	Native	
Asteraceae	<i>Artemisia tilesii</i>	Tilesius Wormwood	Native	4
Asteraceae	<i>Artemisia tilesii</i> ssp. <i>elatior</i>	Aleutian Mugwort	Native	Insuff. Info.
Asteraceae	<i>Artemisia tridentata</i>	Big Sagebrush	Native	3
Asteraceae	<i>Artemisia tridentata</i> ssp. <i>tridentata</i>	Basin Big Sagebrush	Native	5
Asteraceae	<i>Artemisia tridentata</i> ssp. <i>vaseyana</i>	Mountain Big Sagebrush	Native	3
Asteraceae	<i>Artemisia tridentata</i> ssp. <i>wyomingensis</i>	Wyoming Big Sagebrush	Native	4
Asteraceae	<i>Artemisia tripartita</i>	Three-tip Sagebrush	Native	4
Asteraceae	<i>Artemisia tripartita</i> ssp. <i>rupicola</i>	Wyoming Threetip Sagebrush	Native	Insuff. Info.
Asteraceae	<i>Artemisia tripartita</i> ssp. <i>tripartita</i>	Threetip Sagebrush	Native	Insuff. Info.
Aristolochiaceae	<i>Asarum caudatum</i>	Wild-ginger	Native	8
Asclepiadaceae	<i>Asclepias incarnata</i>	Swamp Milkweed	Native	6
Asclepiadaceae	<i>Asclepias ovalifolia</i>	Ovalleaf Milkweed	Native	Insuff. Info.
Asclepiadaceae	<i>Asclepias pumila</i>	Low Milkweed	Native	5
Asclepiadaceae	<i>Asclepias speciosa</i>	Showy Milkweed	Native	3
Asclepiadaceae	<i>Asclepias stenophylla</i>	Narrowleaf Milkweed	Native	
Asclepiadaceae	<i>Asclepias syriaca</i>	Kansas Milkweed	Unknown/Undetermined	Absent in MT
Asclepiadaceae	<i>Asclepias verticillata</i>	Whorled Milkweed	Native	5
Asclepiadaceae	<i>Asclepias viridiflora</i>	Green Milkweed	Native	4

<sup>1</sup>C-value codes: 1-10 defined in Table 3 and in Appendix A. ‘Absent’ means the species at this time is not documented to be present in Montana. ‘Insuff. Info.’ means a c-value cannot be assigned because there are too few collections and/or insufficient information to evaluate its response to disturbance and habitat requirements at either the species, subspecies, or variety level. ‘NA’ means a c-value is not applicable because the plant is a hybrid, is reported without verification to occur in Montana, and/or is taxonomically unclear.
